

I will Not Fear by John Flynn

Extra lyrics by Sam Menahem-smenahem@aol.com

The doc takes out his stethoscope
And listens with his ears.
He says I might need surgery,
That brings me close to tears.
I know I had a heart attack
But it's been several years.
So I simply tell him, "Doc,"
I say "I will not fear."

I will not fear 2x. Say it in a voice that's loud and clear
Sing it out for all the world to hear, I will not fear 2x

I feel my breath is getting short,
So I prick up my ears
I try to take a deep long breath,
It seems like death is near.
I think about the ER now,
Is 9.1.1 time here?
But I gather up my strength
And say "I will not fear."

Repeat Chorus

My field it is psychology
I have a Ph.D.
I know a lot about the mind,
And what it does to me.
Yes, it can make my body hurt
Or even disappear,
Then I remember what I really am,
And say "I will not fear..."

Repeat chorus
